Why open source adoption and engagement?

Foundational technologies,
accelerate time to market

Influence de facto standards

Demonstrate technology leadership

Anticipate
Technology Trends

Attract & retain top talent

Increase trust

Why open source adoption and engagement?

Foundational technologies, accelerate time to market

Influence de facto standards

Demonstrate technology leadership

Anticipate Technology Trends

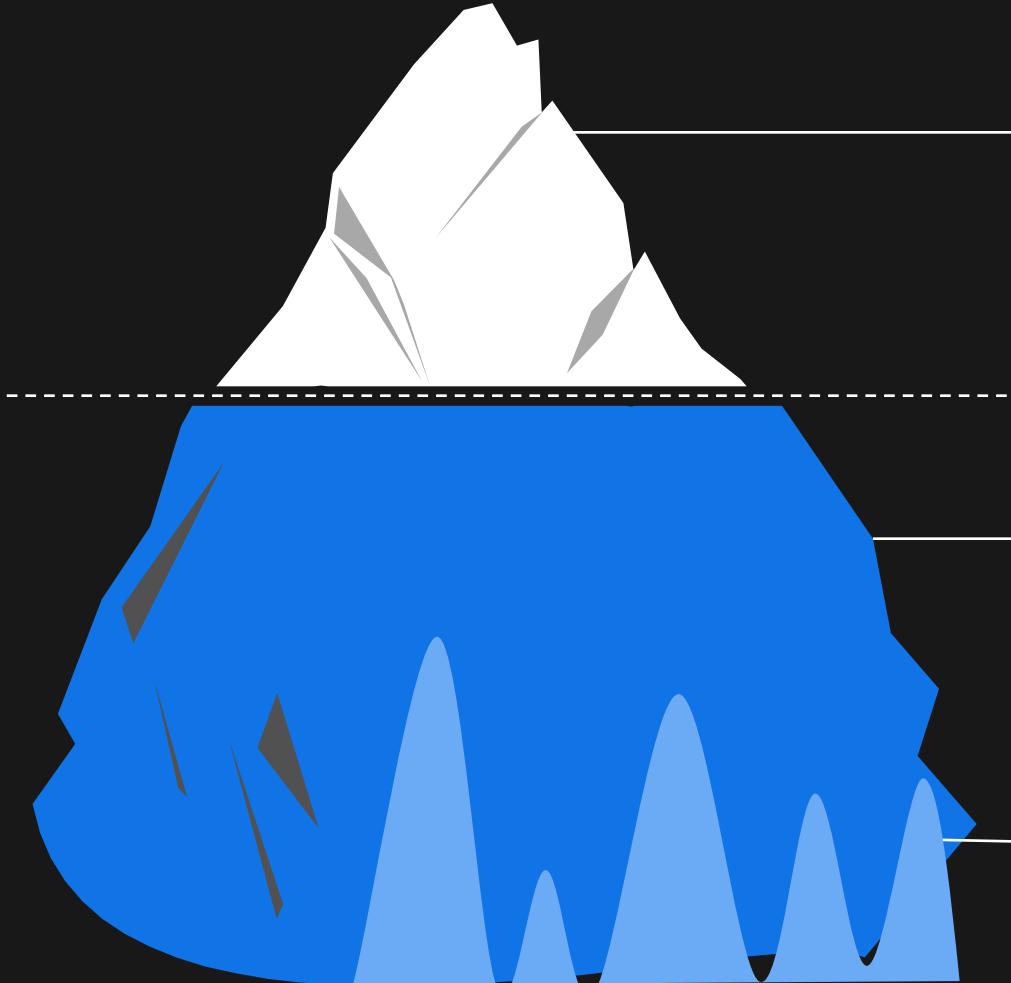

Attract & retain top talent

Building trust

“How do we get better?”

Understand the iceberg

- **Foundational Technologies**

Core digital infrastructure, Cloud & Platform, Web, Security & Trust, Embedded Industrial and Critical systems, AI

- **Open Collaboration Ecosystem**

History: principles and beliefs, collaborative development, legal and licensing, business intersection, multiplicity

- **Currents**

Geopolitical, Regulation, AI

“How do we get better?”

“The first condition of
understanding a foreign country is
to smell it”

Rudyard Kipling

A historical black and white photograph showing several men working on a power line system. In the foreground, a man stands on the ground holding a long pole or tool. In the middle ground, two men are on a tall wooden utility pole; one is standing and working on the equipment, while the other sits below him. Another man stands on the ground nearby. In the background, there are more utility poles, some with multiple cross-arms, and a long train car or wagon on a track. The sky is filled with clouds.

Grow open source developers
